January 2018

**Bravada Gold Corporation is a premier Nevada-focused exploration and development company**, exploring for precious metals in well-established gold trends in one of the world's best gold jurisdictions. The company has a large portfolio of high-quality properties covering a range of development stages from early-stage exploration to advanced-stage exploration and pre-development, with five being funded by partners. **Partners have typically spent ~\$1MM each year advancing Bravada's properties.**

## **BVA has 11 Exploration & Development Properties in Nevada ~9,200 hectares**

### **NEVADA FACTS**

- Produces approximately 5MM ounces of gold per year, roughly 7% of the world total, approximately a quarter from underground mines
- Proven + probable gold reserves are stable, approximately 75MM ounces, replacing production nearly every year
- Production over 200MM oz Au
- 67% of Nevada is federal government land open to exploration
- Stable environmental regulations, economy and mining infrastructure
- Consistently ranked within the top 10 gold jurisdictions in the world to explore and mine by the Canadian Fraser Institute

### **Wind Mountain project**

- 100% owned, gold & silver open pit/heap leach.
- Updated NI 43-101 resource estimate & positive PEA in 2012.
- Untested high-grade exploration target, with **drilling of two deep holes completed in January 2018, assays expected in late February.**

### **Quito**

- High-grade gold, underground potential, similar geology to nearby Northumberland deposit.
- Past-producing open-pit mine: 174,460 Oz Au @ ~6g/t Au production.
- High-grade targets identified, permitting underway for drilling expected in 2018.

## Baxter

- Open pit and underground gold with similar geology to nearby Bruner district.
- **Kinross Gold recently returned 100% ownership to Bravada.**
- Kinross drilled 3 drill programs and discovered shallow oxide gold mineralization at the Sinter target, with highlight hole assaying **32m of 0.88g/t Gold** (drill interval) starting approximately 30m vertically from surface.
- A hole in 2017 indicates this zone extends to the west and remains open as an attractive exploration target; field verification planned early in 2018.

## Other Project Agreements

- **Nevada Zinc** has the option to acquire 100% of BVA's **South Lone Mountain** zinc/gold/silver project for cash, shares, and a retained royalty. BVA's claims partially surround the Lone Mtn oxide zinc deposit, which Nevada Zinc continues to expand beneath gravel cover with drilling.
- **Nevada Zinc** has the option to acquire 50% of BVA's gravel-covered **North Lone Mountain** zinc/gold/silver project for \$150,000 in work expenditures administered by Bravada. The property has a similar geologic setting as Nevada Zinc's expanding Lone Mtn oxide zinc deposit located 7km to the SE.
- **Baker Hughes Oilfield Operations, Inc.** is permitting a mine to extract barite at BVA's **Shoshone Pediment** project. Bravada will be entitled to a \$1/ton royalty from barite production after 150,000 tons have been extracted.
- **Group Ten Metals Inc.** has the option to acquire 100% of BVA's **Drayton** Archean gold project (Ontario) for shares and a retained royalty.

## Several other projects are available for JV

### Directors and Management

Lawrence Page, Q.C., Chairman & Director  
Joseph A. Kizis, Jr., President & Director  
Donald Head, Director  
Nigel Bunting, Director  
Ross McDonald, Director  
John R. Kerr, Director  
Michael Rowley, Director  
Graham Thatcher, CFO

### Corporate Data

Listings: TSX.V: **BVA** OTCQB: **BGAVF**  
Stuttgart: **BRTN**

Shares outstanding: 47,534,619  
Fully diluted: 79,697,382

Management & close associates: 12%
